Tallymarks Font

This font draws western (fence) style tally marks. It is an alternate to the Unicode Western tally marks which provide only a One and a Five glyph, 1D377 and 1D378.

Examples:

Number	Text	Using Tallymarks Font
3	3				
7	A2	⊬Ⅱ
13	FA3	⊬ ⊬Ⅲ
46	A5KFA5KFA1	⊬ ⊬ ⊬ ⊬ ⊬ ⊬ ⊬ ⊬ ⊬Ⅰ

The marks, 1 through 5, 6 through A, and so on, are consistent as if the marks were being added onto, say, a chalkboard. So, the first mark is identical in all 5 glyphs of the group. The first 4 groups of tally marks are unique so that fives will look different from each other when they are side-by-side.

Available tally mark characters:

ASCII	Character	Tallymarks Font
32	(space)	(space)
48	0	˘ (place holder)
